

Chrome Enterprise Upgrade

Quickly deploy, manage, and secure ChromeOS devices with 24/7 Google support

- **Device shipment straight from the manufacturer:** Ship devices directly from the manufacturer to employees, ready for them to access their account with automatic enrollment.
- **Advanced Security:** Remotely disable and wipe devices, force re-enrollment, and enable access restrictions to ensure that data be safe.
- **Manage updates at your own pace:** Choose to release updates gradually or automatically, and with an optional long-term support channel.
- **Fine-grained device controls:** Enable single sign-on, anonymous login and configure printers and Wi-Fi networks.
- **Reports and statistics:** Get more useful reports that includes 7-day metrics, OS versions and crash reports.
- **Cloud-based scalable management:** Manage devices remotely in the Google Admin Console, use UEM solutions from third parties or the Chrome Policy API to manage at a big scale.
